SUMMARY

Final-year B.Tech Computer Science student with hands-on experience in Python, data analysis and classical machine learning. Completed a data analytics internship and built three end-to-end projects. Looking for a junior machine learning or data science role.

EDUCATION

B.Tech, Computer Science and Engineering

Example Institute of Technology, Pune | 2022 - 2026 (expected) | CGPA: 8.4 / 10

Relevant coursework: Data Structures, DBMS, Operating Systems, Machine Learning, Probability and Statistics, Computer Networks

EXPERIENCE

Data Analyst Intern - Brightpath Analytics, Pune

May 2025 - Jul 2025 (3 months)

- Cleaned and transformed 200K+ rows of retail sales data using Python (Pandas, NumPy) and SQL, reducing manual reporting time by about 40%.
- Built 5 interactive dashboards in Power BI for the sales team to track weekly revenue and regional performance.
- Wrote SQL queries (joins, CTEs, window functions) on PostgreSQL to produce monthly customer retention reports.
- Trained a baseline logistic regression model in scikit-learn to flag customers likely to churn (accuracy 78% on held-out data).

PROJECTS

Movie Recommendation System | Python, scikit-learn, Pandas, Streamlit

- Built content-based and collaborative filtering recommenders on the MovieLens dataset (100K ratings).
- Evaluated using RMSE and precision@k; collaborative filtering improved precision@10 from 0.21 to 0.29 over the content-based baseline.
- Deployed a simple Streamlit interface where users pick a movie and get 10 recommendations.

Student Attendance Management App | Flask, SQLite, HTML/CSS

- Developed a web app with login, class-wise attendance marking and monthly percentage reports for about 120 students.
- Designed a normalised SQLite schema with 4 tables and wrote REST-style routes for CRUD operations.

House Price Prediction | Python, scikit-learn, Matplotlib

- Compared Linear Regression, Random Forest and Gradient Boosting on the Kaggle Ames housing dataset.
- Applied feature engineering and cross-validation; best model (Gradient Boosting) reached R-squared of 0.88.

TECHNICAL SKILLS

Languages: Python, SQL, Java (basic), C++ (basic)
Libraries and ML: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn
Tools and Frameworks: Git, GitHub, Flask, Streamlit, Power BI, Jupyter Notebook, PostgreSQL, SQLite
Soft skills: Team collaboration, presenting findings, problem solving

ACHIEVEMENTS AND ACTIVITIES

- Finalist, college hackathon (2024): built a campus bus-tracking prototype in 24 hours with a team of 4.
- Completed Machine Learning Specialization (online course certificate), 2024.
- Technical team member, college coding club; conducted 2 Python workshops for first-year students.
